Annex I: 3.1 Background to the programme

- > Mandate of the Faculty/PG Institute/Institute in offering the degree programme
- ➤ Details as regard to the current status of Faculty/PG Institute/Institute Existing departments/Boards of Study/Specialty Boards/Education Committees etc. and PG degree programmes offered
 - Student intake
 - Staff cadres
 - Educational facilities
 - Common facilities

	Faculty/PG Ins	titute/Institute: Mana	gement				
	Department/ BOS/SpB/ Education Committee etc.	Offered Degree Programme	Abbreviation	Student Intake	Staff cadres	Educational facilities	Common facilities
1	Eg. Department of Business Management	Bachelor of Science Honours in Business Management	BScHons (Business Management)				
2	Board of Study Agriculture	MSc Agriculture	MSc (Agric)				

>	Proposal must give a general description of the benefits that will be accrued by the students who will pursue degree level training and the sector (s)/employment markets to which the postgraduate(s) could look for gainful employment					

Annex II: 3.2 Justification

3.2 a Major stakeholder groups from whom view Associations, Professional Bodies, Alumni etc) b. If not taken whether the decision to introd from the Cabinet, UGC, Ministry etc. (Please a	uce the PG Programme was based on a directive					
3.2 b Survey/Questionnaire/Interview if relevant	as per (a) above					
When Conducted	Number of persons in sample					
3.2c Result of Survey/Questionnaire/Interview if	relevant as per (b) above					

Annex III: 3.10 Programme Content

<u>Each</u> course unit in the proposed programme should be described in the format given below

Semester 1							
Course Unit/Module/Other							
Code:							
Course Unit/Module/Other Name:							
Credit Value:							
Core/Optional							
Hourly Breakdown	Theory	Practical	Research	Others	Inde	pendent	Learning
This should be provided as hours	,					<u>'</u>	
assigned for lectures, practical classes, thesis etc or independent							
learning, such that a total of 50							
notional hours of learning are							
required for each credit. For industrial training and research							
projects, one credit requires 100							
notional hours of learning.							
Course Aim/Intended Learnin	_					_	
(how to write ILOs: At the cor	npletion of t	his course	student w	ill be able	to - in	action ve	erbs)

'							
Any other details of Assessments (give details):							

Recommended Reading – Mandatory and Optional
(Books, E Books, Journals, Magazines, Web Based teaching material and sites):

Please include constructive alignment for each course using the following template.

Course: <Code> <Title>

ILO	Teaching and Learning Activities	Assessment
ILO 1		
ILO 2		
ILO 3		
ILO 4		
ILO 5		
ILO 6		
ILO 7		

[See notes on constructive alignment at the end of this application form]

Annex IV: 4. Programme Delivery and Learner Support System

Describe the teaching learning methods that will be used for delivery of the programme of study, and the	he
learning resources that will be available to support student learning.	

The learning activities must be student-centred, and include opportunities forblendedlearningthat makes					
judicious use of ICT based tools.					

Annex V: 5. Programme Assessment Procedure/Rules-By Laws

(The following should be given in detail)

Formative and summative examinations in the program
Scheme of Grading (Grades/Grade Points/ Marks ranges)
Calculation of Grade Point Average (GPA)or Final numeric % Mark
Contribution by each semester to final GPA or numeric mark if any
Contribution by in-plant training etc. to final GPA
Any other methods used for Grading with details: (In Medical Faculties no GPA)
Repeat or Second examinations
Requirements for award of the degree
Requirements for award of classes
Requirements for award of distinctions

Notes: Constructive alignment

"Constructive alignment is a design for teaching in which what it is intended students should learn and how they should express their learning is clearly stated before teaching takes place. Teaching is then designed to engage students in learning activities that optimize their chances of achieving those outcomes, and assessment tasks are designed to enable clear judgments as to how well those outcomes have been attained" (Biggs, 2014, pp. 5-6).

The constructive alignment approach recognizes "knowledge is constructed by the activities of the learner" (Biggs, 2014, p. 9) rather than being directly transferable from teacher to student. "Learning takes place through the active behavior of the student: it is what he does that he learns, not what the teacher does." (Tyler, 1949)

Alignment occurs when the learning activities that we ask students to engage in help them to develop the knowledge, skills and understandings intended for the unit and measured by our assessment. A constructively aligned unit capitalizes on the powerful effect of assessment on students' learning experiences. If assessment drives students' learning, then students are most likely to achieve our intended outcomes if the assessment is aligned with our intentions.

The framework of constructive alignment is represented in the University's recommended approach to unit design:

- 1. Identify the intended learning outcomes
- 2. Design assessment tasks to measure attainment of the learning outcomes
- 3. Plan learning activities to enable students to develop the skills, knowledge and understandings described in the intended learning outcomes and measured by assessment
